NOTE- This Virtual Machine is required only if you are not having Visual Studio 2013 with Azure SDK installed.

STEP-1 Hardware and Software Required

To run this VM we need computer with following configurations

Hardware :

→80 GB free space in hard disk drive

→8 GB RAM[recommended] 4 GB RAM [Minimum]

→Intel i3 Processor

Software :

→Windows 7 or higher Operating System

→Admin Rights to install Software

→VMware workstation 10 [already given in link(STEP-2)]

→WinRar to extract Files [already given in link(STEP-2)]

STEP-2 Downloading VM from OneDrive

Note- you need very Good internet connection as size of this VM is BIG

→Go to http://1drv.ms/1SNgPtN and you will get OneDrive Folder in which there are number of **.rar** files like this

Files > Azure VM with Visual Studio 2013

	Name	Date modified	Sharing	Size
	Maruti_azure.part01	12/24/2015	Owner	700 MB
	Maruti_azure.part02	12/25/2015	Owner	700 MB
	Maruti_azure.part03	12/25/2015	Owner	700 MB
	Maruti_azure.part04	12/27/2015	Owner	700 MB
	Maruti_azure.part05	12/27/2015	Owner	700 MB
	Maruti_azure.part06	12/29/2015	Owner	700 MB
	Maruti_azure.part07	12/31/2015	Owner	700 MB
	Maruti_azure.part08	1/1/2016	Owner	700 MB
	Maruti_azure.part09	1/4/2016	Owner	700 MB
	Maruti_azure.part10	1/10/2016	Owner	700 MB
	Maruti_azure.part11	1/10/2016	Owner	700 MB
	Maruti_azure.part12	1/10/2016	Owner	700 MB
	Maruti_azure.part13	1/10/2016	Owner	700 MB
	Maruti_azure.part14	1/10/2016	Owner	700 MB
	Maruti_azure.part15	1/10/2016	Owner	700 MB
	Maruti_azure.part16	1/10/2016	Owner	700 MB
	Maruti_azure.part17	12/24/2015	Owner	302.69 MB
	wrar393	12/22/2015	Owner	1.3 MB

→Here you can see We have total 17 .rar files which are Virtual Machine files and I have given winrar free version by which you can extract that. Download all the files and follow these steps

1. →To extract first download all files in your machine and keep them in same folder.
2. →Then install Winrar
3. →Then Right Click on Only First part of the list [**Maruti_azure.part01.rar**] and click on extract here on it [Note:- all other parts will be automatically extracted]

→Once Extraction is done you will get following folder.
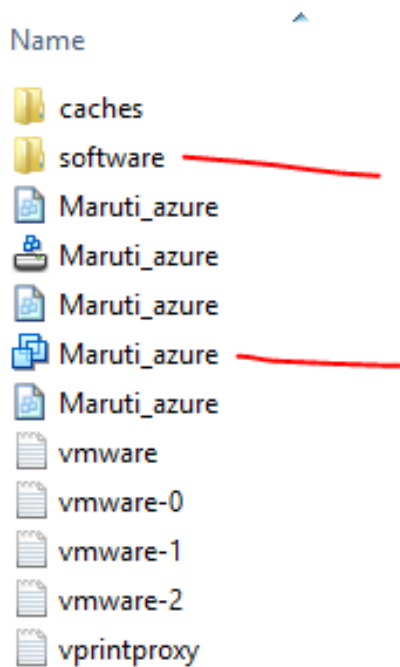

→Folder with name software is having VMware WorkStation 10 which is required to run this VM so kindly install it.

→Once installation is done Marked File with name **Maruti_azure** is startup file so just Double Click on that and that will load configuration of the VM and you will get screen like this.
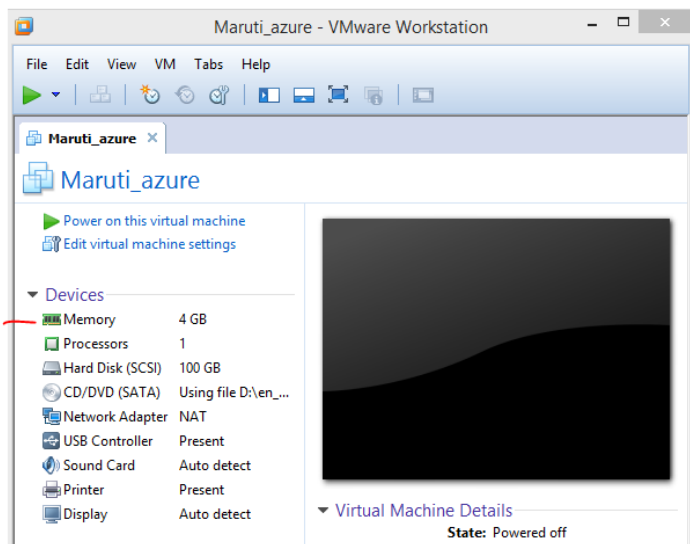

→You can See its configured with 4GB ram so you should have 8GB in your machine [Double then what you have given to run VM]

→Next Click on **Power on this virtual machine**

 →And this will start virtual machine, wait till Operating System loads and then that will ask password like this.

→Password for this VM is **trainermaruti**

→Once this is done that VM is having windows 8.1 OS and all the softwares which are required for this training.

NOTE- This Virtual Machine is required only if you are not having Visual Studio 2013 with Azure SDK installed.
